

ARRI FSND FILTER

The front line of image control

Invisible, accurate, consistent. ARRI Full-Spectrum Neutral Density (FSND) filters fade into the background, preserving the intent of the cinematographer regardless of filter strength or focal length.

ARRI FSND FILTER

Features:

- Made of extremely high-quality Schott B270i glass, with completely flat and parallel surfaces that prevent distortion and astigmatism when used with very long lenses (crucial for UHD).
- Exceptionally accurate and consistent exposure control.
- Color neutral and consistent from batch to batch.
- Eliminates IR pollution on any camera.
- Perfectly preserves skin tone and doesn't fade over time.
- Advanced anti-reflective coating reduces or eliminates interactions between lens elements and adjacent filters (crucial for HDR).
- C-Shaped, blackened filter edges resist chipping and reflection.
- Oil and water-resistant.
- Easy and fast to clean.
- Hard coated for long filter life.
- Laser-engraved barcodes facilitate quick check-in and check-out for rental houses.

Perfectly matched filtering from 0.3 to 2.4

ARRI FSND 1.2

Competitor A

Competitor B

Neutral density filters are used more often than any other type of filter. Their effect should be limited to one attribute: reducing the amount of light reaching the sensor, with no other visible effect. This is not an easy task, and ARRI has created a line of filters that not only meets this goal, but exceeds it in ways not matched by other manufacturers.

ARRI FSND filters preserve color balance perfectly, eliminating color distortions and preserving lush skin tones. They are universal filters that produce the same high-quality result with every camera.

Anti-Reflective Coating

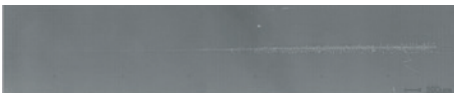

No coating

ARRI AR coating

Competing ND filters produce strong optical artifacts. ARRI's cutting-edge anti-reflection coating minimizes flare, glare, and reflections, preserving scene contrast while eliminating distracting artifacts.

Durability

ARRI FSND 1.2

Competitor ND 1.2

ARRI FSND filters are constructed to withstand the needs of fast-paced productions without compromise. Optical characteristics are permanently stable (no fading or bleaching) and the filter surfaces are exceptionally resistance to scratching.

In an extreme scratch mark test, the ARRI FSND filter significantly outperformed a competing ND filter. Each filter was attacked by a diamond-tipped stylus, with pressure progressively increased to 50N (approximately 5 kg load) from left to right.

ARRI FSND FILTER

Filter	Size	Weight	Ident-No.
ARRI FSND 0.3 Filter	6.6" x 6.6" 167,6 mm x 167,6 mm	0,609 lbs 276,6 g	K2.0013892
